

2023 AAHA MANAGEMENT OF ALLERGIC SKIN DISEASES GUIDELINES

Do your allergic disease cases seem larger than life?

Are you fighting the urge to run away when you see another itchy pet on your schedule?

Managing allergic skin diseases in dogs and cats can be challenging. These guidelines offer detailed diagnosis and treatment plans to help guide you to better patient outcomes and client satisfaction.

Look to the guidelines for how to diagnose and treat these conditions in dogs and cats:

Spectrum of care considerations for allergic skin diseases

✓ Flea allergy

✓ Food allergy

✓ Atopy in dogs and Feline atopic skin syndrome

Client communication tips

Optimizing the role of veterinary technicians for better workflow

Guidance on when to refer to a specialist

Remember that a multimodal approach often works best, along with ongoing communication with the pet's family members and caregivers.

Take the scary out of managing allergic patients with the 2023 AAHA Management of Allergic Skin Diseases Guidelines.

Let AAHA guide you to better outcomes for your itchy patients! The Management of Allergic Skin Diseases Guidelines are available now at aaha.org/allergic-diseases
