

Transforming Lives

Nutrition is Vital

In fact, it's the **5th Vital Assessment**, so let's make nutrition conversations easier by using the **PAWS** pathway to success.

Here's some sample language:

PURPOSE

"What are we seeing [pet's name] for today?"

"What are your goals for today's appointment?"

ALLOW INPUT

"Walk us through everything your pet eats in a typical day, including treats, supplements, people food, etc."

"If we could help your pet by simply changing their food, would you be open to it?"

WARMTH

"I see how much you care about your pet."

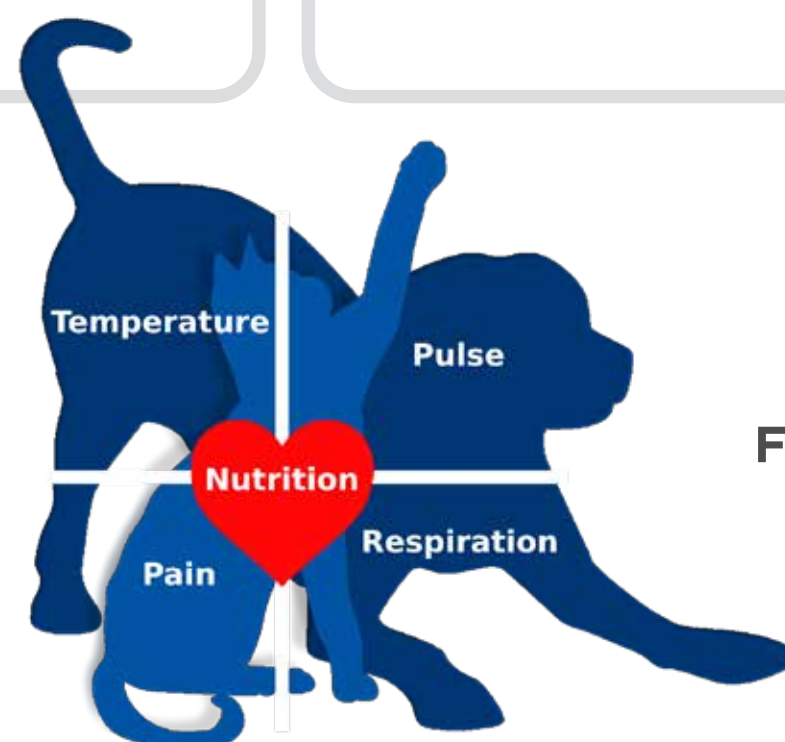

"We both want what's best for your pet."

SOLUTION

"I recommend that you should feed only this food until we decide that a change is needed. Here's why it's right for [pet name]."

"Here are some tips to make sure [pet's name] switches easily to the new food."
