

DETERMINE IDEAL WEIGHT IN 2 STEPS

BFI Risk Chart

The right weight loss nutrition can help reduce the risks associated with high body fat percentage.

As body fat increases, so does the risk for:

- Shortened life expectancy
- Diabetes mellitus
- Reduced mobility
- Arthritis
- Increased physical injury
- Respiratory disease
- Kidney disease
- Cancer

STEP 1

Establish the dog's current body fat percentage by selecting the body shape and description that best matches theirs.

See reverse side for Step 2.
